

AI House Residency - Chatbot Q&A Guide

Q: What is AI House?

A: AI House is a 3-6 month immersive residency for aspiring AI engineers and recent grads. You'll live in a furnished shared home in Antioch, CA (Brentwood border) and work on real-world AI projects. It's a launchpad for your AI career.

Follow-up:

- Would you like to see some example projects students work on?
- Want to know how AI House is different from other bootcamps?
- Interested in who leads the program and mentors the students?

Q: How do I apply?

A: Apply at <https://aihousebay.com/#apply>. Share your resume, achievements, and links to past projects. We only accept 4-5 committed residents per batch, so apply early with detailed info!

Follow-up:

- Would you like me to open the application form for you now?
- Need tips on what to include in your application?
- Want to know about the selection criteria or timeline?

Q: What's included?

A: Included: private furnished room, breakfast + snacks, cloud access (AWS/GCP/Azure), GPU compute, GitHub access, guest lectures, and mentorship. Lunch/dinner can be added.

Follow-up:

- Would you like to see a breakdown of the weekly schedule?

- Want to know how cloud access and GPUs are allocated?
- Interested in how mentorship works during the residency?

Q: Where is the location?

A: The program is located in Antioch, CA (Brentwood area), close to Silicon Valley. Great for focused work while staying connected to Bay Area opportunities.

Follow-up:

- Want to see photos or videos of the residency space?
- Curious about local attractions and food around Antioch/Brentwood?
- Need help figuring out travel or housing logistics?
